

DIEGO RODRIGO PEREZ PACHECO

Data Scientist & Software Engineer | Python | FastAPI | Computer Vision | NLP | Kubernetes

Serra, ES, Brazil | diegoperez.ufes@gmail.com | linkedin.com/in/diego-perez-758760101 | github.com/Diegorpp

SUMMARY

Software engineer and data scientist with 6+ years of experience delivering AI-powered solutions across computer vision, NLP, and backend systems. Reduced over 200,000 manually processed documents each year using computer vision pipelines; built RAG-based applications for reliable chatbot information retrieval; orchestrated all projects on Kubernetes clusters. Service integrations built end-to-end with FastAPI, backed by several years of PostgreSQL experience and a strong infrastructure foundation.

TECHNICAL SKILLS

Languages: Python (advanced), SQL, Bash

Frameworks & Libraries: FastAPI, PyTorch, TensorFlow, scikit-learn, Pandas, OpenCV, Airflow

Infrastructure: Kubernetes, Docker, RabbitMQ, PostgreSQL

Practices: REST API design, RAG/LLM pipelines, Microservices, Domain-Driven Design, CI/CD

EXPERIENCE

Vert Integradora de TI

May 2020 – Present

Senior Data Scientist

Remote · Oct 2024 – Present

- Lead end-to-end data science initiatives across computer vision, NLP, and RAG-based LLM pipelines; own architecture decisions from research through production deployment on Kubernetes.
- Mentor junior engineers on Python best practices, API design, and ML operationalization; contribute to cross-team technical alignment.

Data Engineer (Backend / MLOps)

Remote · Apr 2022 – Oct 2024

- Designed and deployed RESTful APIs with FastAPI covering data transformation, ML model serving, and pipeline orchestration.
- Managed containerized microservices on Kubernetes (rolling updates, scaling, inter-service networking) and integrated RabbitMQ for async event-driven workflows.
- Designed PostgreSQL schemas and optimized queries for both analytical and operational workloads; applied repository/service-layer patterns across monolith and microservice codebases.

Data Scientist Jr.

Remote · Jun 2021 – Apr 2022

- Developed computer vision pipelines for automated information extraction from documents, eliminating over 200,000 manual processing operations per year.
- Built Python inference services for computer vision and NLP models, exposed as production APIs; contributed to architectural decisions on service decomposition.

Trainee

Remote · May 2020 – Jun 2021

- Developed data transformation modules and automation scripts in Python; supported model training and API integration workflows.

Intervip Telecom

Apr 2019 – May 2020

Technical Support Engineer

Serra, ES, Brazil

- Configured and monitored broadband and corporate network infrastructure; debugging Mikrotik based network at many corporate clients to achieve high availability.

EDUCATION

IFES – Federal Institute of Espírito Santo

2026 – Present

Professional Master of Science, Applied Computing

Serra, ES, Brazil

IFES – Federal Institute of Espírito Santo

Jan 2019 – Dec 2024

Bachelor of Science, Information Systems

Serra, ES, Brazil

- Research scholar at NERDS lab (2018–2019): Python automation for horizontal and vertical autoscale experiments.
